Category : Core course

Discipline : Cultural Studies

Prerequisite(s) : Nil

Co-requisite(s) : Nil

Exclusion(s) : Nil

Exemption : Nil
Requirements

Brief Course : This course provides an overview of key themes, concepts, theories and
Description issues in cultural studies. It introduces students to the origins and
foundational concerns of cultural studies as an academic discipline and an
intellectual practice; examines selected critical notions and problems with
reference to specific contexts; and look at the work of cultural studies in
relation to social, historical and institutional conditions. The course also
addresses such issues as the role of theory and analysis in the practice of
cultural studies, the relevance of cultural studies for government and public
cultures, as well as the constraints and possibilities cultural studies workers
face today in their divergent attempts to engage themselves on location in
critical projects of our time.

Aims	: 1. To introduce the basic aims and perspectives of cultural studies as an academic discipline and as an intellectual practice; 2. To look at different dimensions of culture and acquaint students with a range of issues addressed by cultural studies; 3. To provide insight into the complex nature of the relation between the cultural field and the social and economic spheres.
Learning Outcomes (LOs)	: On completion of the course, students will able to: 1. LO1: outline the specific concerns and the general intellectual climate leading to the formation of cultural Studies as a discipline; 2. LO2: describe cultural studies as an engaged study of culture and the impact it may have on society.
Indicative Content	: 1. The concept of culture and the intellectual trajectories of cultural studies; 2. The implications of the “cultural turn” in contemporary societies; 3. The culture of everyday life and the question of identity; 4. Cultural Studies as an engaged study of culture.
Teaching Method	: Lectures and seminar discussions.
Measurement of Learning Outcomes (LOs)	: 1. Understand the intricate relationship between culture and socio-economic changes; (demonstrated by student presentations and the ensuing discussions, LO1 and LO2) 2. Understand a range of issues addressed by cultural studies. (demonstrated by students’ term paper, LO1 and LO2)

Assessment : 100% continuous assessment based on participation in class discussion, class presentation and the completion of a term paper.
Term paper is 70%
Group Presentation is 20%
Class presentation is 10%.
Students are required to form groups of two or three to present their views on a designated topic. Every student should actively participate in the seminar discussion after the lecture. Arrangements for class presentations will be announced by the lecturer.

Term paper to be uploaded at Turnitin **by 27 December 2021**: Of approximate length of 8,000 characters in Chinese or 6,000 words in English. Class presentation (30 to 45 mins) is group presentation. If a particular student is keen on answering questions and expressing one's views, course teacher will give additional marks for that student.

Criteria for group presentation assessment

- Quality of Interpretation of the readings
- The relevance of the case to the arguments raised
- Organization of flow
- Clarity of the presentation/ commentary
- Relevance of questions raised
- Response to classmates' questions

Important Notes:

1. Students are expected to spend a total of 9 hours (i.e. 3* hours of class contact and 6* hours of personal study) per week to achieve the course learning outcomes.
2. Students shall be aware of the University regulations about dishonest practice in course work, tests and examinations, and the possible consequences as stipulated in the Regulations Governing University Examinations. In particular, plagiarism, being a kind of dishonest practice, is “the presentation of another person’s work without proper acknowledgement of the source, including exact phrases, or summarised ideas, or even footnotes/citations, whether protected by copyright or not, as the student’s own work”. Students are required to strictly follow university regulations governing academic integrity and honesty.
3. Students are required to submit writing assignment(s) using Turnitin.
4. To enhance students’ understanding of plagiarism, a mini-course “Online Tutorial on Plagiarism Awareness” is available on <https://pla.ln.edu.hk/>.

Brief Course Description :	:	This course focuses on the relationship between critical theories and popular culture. It examines how the mediation of popular culture affects the ways in which our everyday life experience is shaped. Our main concern is that a renewed understanding of the everyday experience through popular culture can provide illuminating examples and patterns of critical thinking much needed for public cultural education today. Students will learn about different approaches to the many forms of popular culture, from cinema to popular journalism, from advertisement to shopping mall culture, to video games, fan stories and the internet. We aim to see how the popular ways of life can be analyzed as representing complex negotiations of power and pleasure, solidarity and resistance, distinction and community formation in a field increasingly characterized by multiple centers and domains of value.

Aims :	: 1. To introduce the basic approaches to popular culture in Cultural Studies so as to allow students to undertake the analysis of individual cases in relevant social contexts; 2. To provide a dynamic inter-disciplinary platform for the discussion of social, ideological, ethical and aesthetic issues through the perspectives of popular culture
Learning Outcomes (LOs) :	: On completion of the course, students will be able to: 1. LO1 : demonstrate a critical understanding of the relationship between popular culture and everyday life in the contemporary context; 2. LO2 : discuss critical insights on a range of examples encountered in local contexts relating to the experience of popular culture as a dimension of the everyday life; 3. LO3: present in-depth analysis of individual cases of popular culture formation with a relevant critical perspective.
Indicative Contents :	: 1. Popular culture and cultural studies: the question of culture and <i>value</i> re-visited; debates on the critical attitude toward and status of popular culture in its many forms (e.g., fiction, fashion journalism, advertisement, tourism, shopping, media and cyber culture); 2. Analytical approach to the practices of everyday life: culture as <i>ordinary experience</i> in the contemporary contexts; the critical concept and functions of <i>mediation</i> in popular culture; <i>play, performance</i> and <i>consumption</i> as the key dimension of popular experience for cultural analysis on the everyday; 3. Interface with popular sensuality, commodity and everyday culture: culture as event, spectacle and meaningful acts; popular culture and the experience of home, community, the state and the globe; identity and difference; social relation, aesthetics, history and politics; globalization, fetishism, and the society of the spectacle (cases to be examined may include: celebrity and fan culture; shopping, tourism, and consumer culture; sport, eating, digital and cyber cultural activities).
Teaching Method :	: Lecture and class discussion (in groups), with student reports on readings and project outlines. Emphasis is put on student participation in the

analysis of issues, relating their own views and experience of popular culture to the critical questions addressed in the course framework. Guest speakers are invited to share perspectives from the industry points of view when appropriate.

Measurement of Learning Outcomes	: 1. Class Participation • Group presentations and discussions on selected topics to test students' understanding of assigned readings, grasp of theoretical materials, and application of conceptual framework to local examples; • Reading reports on the assigned materials give an opportunity for students to follow up on their oral presentations in class, and develop critical understanding on a small issue in the form of reading notes or analytical reflections; • Class discussions (in roundtable format) on term paper proposals help students to formulate initial project ideas, develop critical problems for in-depth study, and share with others their viewpoints on selected topics/cases through dialogues (LO2). 2. Mid-term Assignment • An analysis of either (i) a single popular cultural text, or (ii) a well-defined site or process of everyday/popular cultural production and/or consumption of meanings, or (iii) a specific event/activity in everyday lives where cultural meanings are made, mediated and circulated. • This aims to focus students' work in critical analysis on a particular item/site/process in the making of popular culture. Students choose to do either (a) a close reading of the text/site/event that addresses issues as framed within the broader context involved (which the student must identify and discuss); or (b) a critical analysis of an issue or concept studied in the course with reference to the particular case chosen (LO1, LO2). 3. Term Paper • A well-focused study of a specific topic discussed in the course, which reveals students' command of their critical and analytical ability in handling a contextualized problem or case of popular/everyday life culture effectively. Students' ability to present and examine the case/topic with an effective framework of critical analysis would be assessed (LO1, LO3).

Assessment : 100% Continuous Assessment, to be based on:

1. Group Presentation (10%)
2. TWO Reading Reports (2-4 pages each) on any assigned materials.
(10% x 2 = 20%)
3. Term Paper Proposal (10%)
(*Presentation: in English, Cantonese or Putonghua)
4. Mid-term (Short) Assignment (30%)
5. Term Paper (30%)

On a focused study of any one of the topics/areas discussed in the course, of approximate length of 4,000 characters in Chinese or 3,000 words in English.

Class presentation (30 to 45 mins) is group presentation. If a particular student is keen on answering questions and expressing one's views, course teacher will give additional marks for that student.

Criteria for group presentation assessment

- Quality of Interpretation of the readings
- The relevance of the case to the arguments raised
- Organization of flow
- Clarity of the presentation/ commentary
- Relevance of questions raised
- Response to classmates' questions

Important Notes:

1. Students are expected to spend a total of 9 hours (i.e. 3* hours of class contact and 6* hours of personal study) per week to achieve the course learning outcomes.
2. Students shall be aware of the University regulations about dishonest practice in course work, tests and examinations, and the possible consequences as stipulated in the Regulations Governing University Examinations and Course Work. In particular, plagiarism, being a kind of dishonest practice, is “the presentation of another person’s work without proper acknowledgement of the source, including exact phrases, or summarised ideas, or even footnotes/citations, whether protected by copyright or not, as the student’s own work”. Students are required to strictly follow university regulations governing academic integrity and honesty.
3. Students are required to submit writing assignment(s) using Turnitin.
4. To enhance students’ understanding of plagiarism, a mini-course “Online Tutorial on Plagiarism Awareness” is available on <https://pla.ln.edu.hk/>.

Brief Course : This core course will question the 'ordinary' ways we learn to see, speak, know and experience things; that is, how we learn to behave both as subjects of our own actions and when we are subjected to the actions of others. Theoretical approaches in cultural studies to pedagogical processes formative of the person will be introduced to open up familiar aspects of our behaviour for critical discussion. These include language, memory, experience, culture, technology, knowledge, identity, and power. On the practical side, the course will examine how education as an institutional practice works to perpetuate established power relations. It will also examine how a 'decolonizing' approach to pedagogy can bring together learning experiences that are normally excluded or marginalized in formal education. The history and practice of education in Hong Kong will be the main focus of students' investigations.

Aims	: • To analyze existing educational practices; • To introduce transformative models and practices of pedagogy.
Learning Outcomes (LOs)	: On completion of the course, students will able to: 1. LO1 : discuss the formative processes of subjectivity and outline the pedagogical process as one of interactional relationships; 2. LO2: conduct critical analysis in pedagogy in education, social work and cultural work.
Indicative Content	: • Rethinking education with theoretical insights from cultural studies; • Issues of language and discourse; politics of representation; critical literacy; knowledge and power relations; culture and experience; • Existing pedagogical practices in Hong Kong; • Case studies of alternative practices in decolonizing education.
Teaching Method	: • Lectures provide a conceptual frame for understanding pedagogical processes in the formation of subjectivity, and deal with conceptual works on education, development, and alternatives • Students' presentations on theoretical texts will demonstrate their ability to grasp conceptual works as well as rethink their own pedagogical experiences. • Term papers are individual endeavours proposed by students and discussed during tutorials and consultation sessions; the rewriting of two drafts of the paper will enable students to improve on their presentations after taking in critical comments from the teachers and fellow students.
Measurement of Learning Outcomes (LOs)	: • Students presentations on theoretical texts will demonstrate their ability to discuss among themselves and to develop a critical attitude towards pedagogy; (LO2) • In term project, through individual work, students will demonstrate

how well they reflect on the underlying assumptions of their own pedagogical experiences against the social and political setting of Hong Kong. (LO1)

Assessment : Students are assessed on the basis of 100% Continuous Assessment with the following grade distribution:

Class Participation	15%
Group presentation on readings	25%
Term paper	60%

Brief Course Description : This core course enhances the students to develop a reflexive attitude about and critical abilities of different methods used by cultural researchers. Method here is understood not only as research techniques, procedures, and practices, but also as involving the theories and perspectives that inform the production of a particular kind of research and justify it in terms of knowledge-making. Practical examples will be used to illustrate diverse cultural studies methods such as textual analysis, ethnographic methods (participatory action research, interviews, focus groups and story-telling), oral history, archival work, etc. Discussion of methodological issues involved in those examples will help students map out the trajectories in which cultural studies as a discipline developed in the past and the implications they have nowadays.

Aims	: 1. To guide students to pay critical attentions to the techniques and procedures of doing cultural research in such different areas, such as literature, film and media, popular culture, postcolonial studies, commons, and community economies. 2. To provide a platform for students to discuss different perspectives on research methods and related issues such as research ethics, knowledge, and power.
Learning Outcomes(LOs)	: On completion of the course, students will able to : 1. LO1: apply at least one of the methods learnt in the course to handle a practical or research problem; 2. LO2: present a critical reflection of the research method(s) used and the process of research based on methodological issues discussed in class.
Indicative Content	: 1. Philosophical basis of cultural research 2. Studying lived experience and resistance 3. Ethnography and understanding the Other 4. Reading discourse and ideology 5. Semiotics and genealogy 6. Methods of commoning
Teaching Method	: The delivery of the course is informed by the philosophy and pedagogical principles of flipped classroom and action strategies. Students will take part in lectures, seminars, group and discussion of readings and practical work. The emphasis is on student participation in the analysis of issues, relating their own views, experience and observations to the critical questions addressed in the course framework.
Measurement of Learning Outcomes	: Students will be assessed on their ability to apply at least one of the methods learnt to handle a chosen topic in cultural research and to reflect critically upon the research method(s) used and the process of research. The learning outcomes will be measured in the following ways.

1. Group Discussion

Participation in discussion of assigned materials requires that students review concepts and theories learnt and preview materials in preparation for class. (LO1, LO2)

2. Group Presentations

Group presentations on selected topics aim to test students' understanding of assigned readings, grasp of theoretical materials, and application of conceptual framework to local examples. Students would demonstrate their abilities in applying research methods to reflect and solve practical or academic problems. (LO1, LO2)

3. Individual Written Work

Individual paper requires that students understand the research methods chosen and reflect on the process of applying them in researching the contexts that concern them. (LO1, LO2)

Assessment : The course adopts 100% continuous assessment basing on the following types of assessment.

Assessment Type (%)	Description
1. Commentary and Reflections on Readings (CRR) (20%)	4 assigned readings for group discussions to review topics learnt and preview topics to cover
2. Group presentations (40%)	2 group presentations of 2 topics in class
3. Individual Essay (40%)	1 individual paper, 3000-5000 words, in English or Chinese

Assessment Tasks : 1. Commentary and Reflection on Readings (CRR) (Group work) (20%, 4 assigned course materials, 5%@)

Throughout the course, students will engage in four guided group reading exercises to develop understanding of various issues in cultural research. The guiding questions should prepare students to review the theories and concepts learnt and preview new ones.

Schedule of the assigned readings and guiding questions will be given

in due course.

2. Two Group Oral Presentations (40% = 1st, 15% + 2nd, 25%)

In groups, students will present two topics chosen from “Topics for Group Presentation and Individual Paper” in class.*

a. 1st presentation carries 15% and will be conducted at the mid-term.

b. 2nd presentation carries 25% and will be conducted in the last lesson.

Each group needs to submit the PowerPoint slides and a 2-page summary + a reference list one day ahead of the presentation date. No written report is required.

Peer assessment will be conducted as a reference for the assessment of an individual’s contribution to the group presentation.

3. An Individual Paper (40%)

Students will write an individual paper (in 3000-5000 words, in English or Chinese) on a topic chosen from “Topics for Group Presentation and Individual Paper”.*

The paper should contain two parts:

a. A preliminary but comprehensive, critical and analytical account derived from the materials; and

b. A critical self-reflection upon the methodological issues adopted.

* The submission due dates and “Topics for Group Presentation and Individual Paper” will be given in due course.

Important Notes : 1. Students are expected to spend a total of 9 hours (i.e. 3 hours of class contact and 6 hours of personal study) per week to achieve the course

learning outcomes.

2. Students shall be aware of the University regulations about dishonest practice in course work, tests and examinations, and the possible consequences as stipulated in the Regulations Governing University Examinations and Course Work. In particular, plagiarism, being a kind of dishonest practice, is “the presentation of another person’s work without proper acknowledgement of the source, including exact phrases, or summarised ideas, or even footnotes/citations, whether protected by copyright or not, as the student’s own work”. Students are required to strictly follow university regulations governing academic integrity and honesty.
3. Students are required to submit writing assignment(s) using Turnitin.
4. To enhance students’ understanding of plagiarism, a mini-course “Online Tutorial on Plagiarism Awareness” is available on <https://pla.ln.edu.hk/>.

Brief Course : How do we understand feminism and its relation to the making of our
Description bodies? What is intimacy and how are intimate relations formed? How are sexualities constructed in Asian societies? What is the relationship between feminism, bodies, intimacy and sexualities? From bell hooks' approach on feminism is for everybody to Chimamanda Ngozi Adichie's statement on We Should All Be Feminists to Cinzia Arruzza, Tithi Bhattacharya and Nancy Fraser's manifesto on Feminism for the 99%, students will begin with learning how gender is socially constructed, cultural ideologies are produced and reproduced, and how feminism is practiced in everyday life. Feminism is more than seeking equality with men, rather it takes into account various notions of difference, intersecting identities, femininities and masculinities.

This course will draw upon theoretical strands in feminist studies, cultural studies, queer studies and trans studies as critical tools to understand the social construction of bodies, intimacies and sexualities. By studying case studies and ethnographic research, you will be exposed to the challenges and

obstacles in conducting research on intimate subject matters. Through a close reading of cultural representations, you will learn to analyze the meanings behind media representations on gender identities, heterosexuality and non-normative sexualities. This course examines how the body as a physical entity and a performative act is recognized, negotiated and regulated in closely linked yet diverse Asian societies. You will not only be learning the key theoretical approaches and emerging debates in the field of gender and sexuality studies, but rather, you will contribute by making debates on course materials and coming up with new interpretations of feminisms, bodies, intimacy and sexualities during the course.

Aims	:	• To introduce students to different feminist concepts and theories; • To identify and analyse issues related to gender; • To encourage students to engage in feminist debates involving media representations of gender and sexualities.
Learning Outcomes	:	On completion of the course, students will able to: 1. LO1 : apply feminist perspective and theories to analyze gender and sexuality issues and practices in everyday life; 2. LO2 : analyze the cultural politics involved in the representation and discourses of gender and sexuality and the way meanings are constructed in different contexts; 3. LO3: articulate feminist knowledge to different discipline or fields of knowledge.
Indicative Content	:	1. Cultural constructions of gender, sexualities and the body; 2. Introduction to liberal, radical, postmodern, cyberfeminism, intersectional feminism; 3. Gender and representation politics, e.g. in writings, films, visual arts 4. Cultural politics around the gender-sexuality matrix 5. Gender, everyday life politics and online autonomy

Teaching Method	:	Lecture, seminar discussion, and students' presentation
Measurement of Learning Outcomes	:	The measurement of the three learning outcomes will be based on: 1. The case studies presented by students in the seminars will be assessed by the quantity and quality of the research materials, their ability to apply the feminist perspectives and theories learnt in class to do the analysis, and their understanding of cultural politics involved in the representation and discourses; (LO1, LO2) 2. The final research paper will require students to have an in-depth analysis of the core debates in feminist cultural politics and its practices. Students' ability to articulate feminist knowledge to different disciplines or other fields of knowledge will be assessed. (LO3)

Assessment : 100% continuous assessment based on:

- Presentation in seminar (20%)
- Class participation (10%)
- Term project(70%)

Term project: Of approximate length of 8,000 characters in Chinese or 6,000 words in English. Class presentation (30 to 45 minutes) can be group or individual presentation. If a particular student is keen on answering questions and expressing one's views, course teacher will give additional marks for that student.

Criteria for group presentation assessment

- Quality of Interpretation of the readings
- The relevance of the case to the arguments raised
- Organization of flow
- Clarity of the presentation/ commentary
- Relevance of questions raised
- Response to classmates' questions

Brief Course Description	: Recently Hong Kong—the city and its culture—has often been characterized as hybrid, in-between, in perpetual transit, plural, postcolonial, (post)modern, cosmopolitan, commercial, pragmatic, and so on. With such a proliferation of incompatible concepts and descriptions of Hong Kong, it is apparent that there are serious flaws and misunderstandings about Hong Kong. This seminar investigates specific dimensions of Hong Kong urban culture that involve processes of border-crossing, self-reflexivity, and self-reinvention: the emergence of a Hong Kong urbanscape and local identity in relation to the city’s negotiation between China and the world, the past and the present; the cosmopolitan imagination of Hong Kong as a dialectic of desire and fear in the process of becoming “China”; the making of the Hong Kong popular as a crossing of boundaries in culture, nation, gender and ethnicity. The course will re-examine the various assumptions on the social formations of Hong Kong by discussing various cultural texts including film, writing and architecture. In particular, the course will re-examine the richness of the Cantonese language spoken by people growing up in Hong. At the same time it will examine notions of the intercultural, multicultural, transnational, global/local, postmodern, postcolonial and others.
Aims	: • To provide a critical overview of the culture of Hong Kong as a cosmopolitan city. • To introduce students to major issues of cultural politics and the dynamic perspectives of contemporary urban cultural studies. • To raise students’ awareness of cultural, social and political issues in contemporary Hong Kong and to foster their in-depth understanding of and critical reflections on specific current issues that concern Hong Kong society at large.

Learning Outcomes	: On completion of the course, students will be able to: 1. LO1 : define, describe, discuss, analyze and evaluate the overall condition of the culture of Hong Kong in the broad context of globalization and cosmopolitanism in relation to the reinvention of local culture; 2. LO2: apply critical and systematic approaches in interpreting major issues of cultural politics from the perspectives of contemporary urban cultural studies; 3. LO3: explain and argue—verbally and in written discourse of considerable length—on specific cultural issues that concern the general Hong Kong community.
Indicative Content	: • The nature of city and what it means to see Hong Kong as a city. • The production of space and the peculiarities of the social space of Hong Kong. • The significance of spatial practice carried out on a daily basis. • Limitations of current views of Hong Kong. • Hong Kong as a meeting of empires. • The political implications of Hong Kong musicals. • The significance of the Cantonese language as spoken in Hong Kong.
Teaching Method	: Lecture, student's class presentation and seminar discussion

- Measurement of Learning Outcomes :
1. Students' knowledge and skills on narrating and analyzing aspects of the culture of Hong Kong with reference to local culture, globalization and cosmopolitanism will be measured by their course papers which require an academic format and style with a critical-analytical orientation. Class discussion will test students' ability to carry out informative and critical dialogues interpersonally in a group situation; (LO1)
 2. Short written assignments assess students' acquisition of conceptual knowledge of cultural politics in contemporary urban settings. Class discussion requires students to reflect on their understanding of theoretical concepts through a questioning process; (LO2)
 3. Oral presentations require students to demonstrate their substantial understanding of the polemics of specific current cultural issues of their own choice in well-organized speeches and/or multimedia delivery. Course papers assess students' skills in presenting elaborated arguments and sophisticated speaking positions concerning specific cultural and social controversies using. (LO2, LO3)

- Assessment :

 3. Class participation (10%)

Research paper: Of approximate length of 8,000 characters in Chinese or 6,000 words in English. Class presentation (30 to 45 minutes) can be individual or group presentation. If a particular student is keen on answering questions and expressing one's views, course teacher will give additional marks for that student.

Criteria for group presentation assessment

- Quality of Interpretation of the readings
- The relevance of the case to the arguments raised
- Organization of flow
- Clarity of the presentation/ commentary

- Relevance of questions raised
- Response to classmates' questions

- Important Notes : 1. Students are expected to spend a total of 9 hours (i.e. 3* hours of class contact and 6* hours of personal study) per week to achieve the course learning outcomes.
2. Students shall be aware of the University regulations about dishonest practice in course work, tests and examinations, and the possible consequences as stipulated in the Regulations Governing University Examinations and Course Work. In particular, plagiarism, being a kind of dishonest practice, is “the presentation of another person’s work without proper acknowledgement of the source, including exact phrases, or summarised ideas, or even footnotes/citations, whether protected by copyright or not, as the student’s own work”. Students are required to strictly follow university regulations governing academic integrity and honesty.
3. Students are required to submit writing assignment(s) using Turnitin.
4. To enhance students’ understanding of plagiarism, a mini-course “Online Tutorial on Plagiarism Awareness” is available on <https://pla.in.edu.hk/>.

Brief Course : This course will examine the food movement as one of the significant
Description emerging social and livelihood movements across the globe. It is not only a reaction to the threats to food production, food sovereignty and food security: climate change, nuclear disaster pollution, contamination of water and soil, reduction of farmland, monopoly by multinational agribusiness, and speculation of food prices in futures markets. It is also putting in practice a self-reliant mode of living that is inherently just and democratic. Farming and agriculture in Hong Kong will be one of the case studies, and students will also be required to engage in farming so as to learn about principles of permaculture.

Aims and Objectives	: • to introduce basic knowledge and cross-disciplinary analytical frameworks to the contemporary issues of food and agriculture • to articulate the various significances of food and agriculture both as a source of self-understanding and medium to act in the contemporary capitalism
Learning Outcomes (LOs)	: By the end of the course, students will be able to: • understand the development of the agriculture and food system in Hong Kong from a historical and critical perspective • articulate the situation of Hong Kong to the post-war dynamics in Asia and global capitalism • identify the various meanings and approaches of grass-root actions and resistant food/agricultural movements in the world • familiarize with the operation of a permaculture farm from the perspectives of resources circulation and community interaction
Indicative Content	: • the culture, politics and history of Hong Kong agriculture • analytical frameworks for post-war global development of agriculture and food industry • climate change and nuclear threat • the conception and practices of alternative agricultural practices • various local food movements on the global scene
Teaching Method	: Lecture, seminar discussion and presentation

Measurement of Learning Outcomes (LOs)	: 1. Written assignment Students will write an critical discussion and reflection on related documentary films and videos (the list will be provided in due course). 2. Term paper Students will write a paper on a food movement/alternative agricultural practice of their choice, demonstrating their ability to critically discuss its concepts and trajectory, to identify the issues addressed by it, the strategies and tactics it employed and its unique significance to the ecology and/or humanity. 3. Farm visit/work Visits will be arranged to a local organic farm where students' attendance are expected. On location, they will have an change to understand the context and difficulties of running an organic farm in Hong Kong. They will also be provided with opportunities for farm works, hence an basic understanding of how permaculture works to interact with the ecology.
Assessment	: • Participation and discussion (20%); • Written assignment (40%) to be submitted in mid-term (TBC); • Term paper (3,000 Eng or 5,000 Chi) (40%) to be submitted by 29 December 2015 • Please submit your assignments in hard copy (please put them at the collection box outside the general office) and soft copy (to the subject teachers and mcs@ln.edu.hk) • NOTE: PLAGIARISM is an academic crime and may lead to disciplinary action. LATE submission of assignments is subject to penalty (e.g., down-grading), unless prior permission is given under special circumstances.

Brief Course Description	: This course serves as the second part of the Cultural Politics of Labour series, specifically focusing on digital labour, technology, and the cultural and creative industry. From a theoretical standpoint, the course engages with various theoretical frameworks such as Marxist feminism, autonomist Marxism, and classic Marxism to examine the concept of digital labour and the digital worker within the context of contemporary capitalism. In an analytical sense, the course employs case studies and examples from literature, media, and popular culture to illuminate how the meanings, ideologies, and rhetoric surrounding digital labour and network technology are shaped, manipulated, negotiated, and contested. For instance, it scrutinizes the portrayal of tech companies as 'fun,' 'playful,' and 'creative' workplaces, while also exposing the power dynamics and social inequality underlying these representations through cultural analysis and criticism.

Moreover, the course delves into resistance movements that challenge dominant discourses and meanings, such as the anti-work movements and the '996, ICU' project initiated on GitHub. By completing this course, students will acquire a comprehensive understanding of digital labour and network technology, enabling them to analyse the discourse and underlying ideologies constructed within the media sector and everyday life.

Brief Course Description	: This course explores the intricate relationship between humanity and materiality, examining the ways in which people and things interact. Drawing upon scholarship from diverse disciplines, we anchor our inquiry within the realms of cultural representation (encompassing works of art and literature), material exchange (spanning the gift and the commodity), and the intimate quotidian encounters (from toys to apparel and to furnishings). Our investigation navigates the delicate equilibrium between the reification of humans and the anthropomorphization of things, aiming to transcend the traditional subject-object distinction that has hitherto characterized the human-nonhuman relationship. Attending instead to their mutual constitution, we explore not merely how meanings and sociality are constructed through materiality, but also how inanimate objects may function as agents shaping human subjectivity. Brief Course Description : This course examines the cultural politics of labour in China, with a particular focus on industrial and platform workers. The goal is to offer an evidence-based, analytically rigorous and radically contextualised understanding of the trajectories, experiences, ambivalences and inequalities these workers face on the one hand, and to demonstrate their struggles, agencies, visions, actions and futures on the other. To achieve this, we start with the political economy of China's reform project that set the stage for the historical rise of these workers. Students are then taken a walk through the various sites - including workplace, consumption, media, literature, education, family, community, and love, etc. – where workers of different groups work and live their daily lives, before diving into the past

by revisiting the socialist cultural politics of labour in order to imagine an alternative future. Such nuanced and dialectical analysis is expected to not only enhance students' understanding and analysis of labour issues in China, but more importantly to inform possible practices and actions to help build a fairer world of work and society at large. Guest speakers, practitioner workshops and fieldtrips to industrial zones will be arranged where feasible to enhance students' learning experience.

Brief Course Description

As we live in an increasingly digitalised world, this course seeks to deepen students' understanding of the fast-evolving digital culture, while explores and expands their creative potential in digital cultural production through a wide range of digital cultural forms.

It will do so by providing students with a critical understanding of how meanings and values are constructed and contested in processes of creative cultural production and audiences/consumers' reception and participation through a variety of digital forms, with a particular focus on the exercise of power over how we think, feel and act. It explores the opportunities and challenges digital technologies and platforms present for the creation of a globally interconnected space where people can conduct public life in positive, just and inclusive ways. The discussion focuses on such timely issues in contemporary public life such as class, gender, (im-)migrants, race, the nation, social movement, and data and surveillance.

Students will engage in their own digital production projects. The creative processes of digital cultural production aim to enhance students' digital literacy and creativity, develop their digital cultural languages and organisational skills for personal, cultural, and socio-political expression and communication, and deepen their understanding of the politics, possibilities, and limitations of digital cultural formations in the world around us.

Aims

- To introduce students to critical theories and themes in studies of the production, reception, and participation of digital and internet culture, from material, historical, and socio-cultural perspectives
- To familiarize students with digital cultural languages for expression and communication and enhance their digital cultural literacy
- To enable students to explore their creative capabilities through digital cultures, and equip them with skills that are applicable in cultural and creative industries

[Back to Page 1](#)

Learning Outcomes (LOs)

On completion of the course, students will be able to:

1. develop the themes and theories in studies of the production, reception and participation of digital cultures
2. critically appraise key issues relating to the social, cultural and political aspects of digital and internet cultures around public issues
3. evaluate high level of digital cultural literacy, and basic skills of digital creativity applicable to culture and creative industries
4. explain an alternative digital cultural project on issues related to democracy, equality, and community in their own sociocultural contexts

Indicative Contents

Theoretical foundations

- 1) Cultural aspects of capitalism
- 2) Representation, hegemony, imagination, and the audience-user

Representation and participation

- 3) the representational practice of 'Othering' and the discursive production of difference
- 4) participatory culture and democracy

Media representations and interventions

- 5) hegemonic representations of class, gender, migration, the nation, and social movement through digital cultural forms
- 6) interventions and disruptions of class, gender, migration, the nation, and social movement through digital cultural forms

Participation and Democracy

- 7) media convergence and participatory culture in the changing media/technology landscape
- 8) computer games, short videos, digital museums, digital apps

Structural conditions of representation and participation

- 9) social media, data and Surveillance
- 10) Visibility and the power and politics of Algorithm
- 11) The political economy of social media and participation

Teaching Method

The course will be taught in lectures, tutorials, and production workshops and trips.

- The lectures facilitate students' learning of media representation and media creativity through theoretical discussion and sharing media examples.
- Student presentation and discussion of readings and the conducting of creative media projects take place in tutorials, field visits and media production workshops/trips

[Back to Page 1](#)

- In terms of production workshops and trips, students are welcomed to participate in a collaborative creative digital project that aims to engage with local issues in the “Yuen Tin Tun” area in Northwest New Territories. But they are also encouraged to pursue topics of their own interest.

CUS517 Culture/Creative Commons: Digital Technologies, Policies and Practices

數字與文化創新前沿：共同體、政策與實踐

Course Title	: Culture/Creative Commons: Digital Technologies, Policies and Practices 數字與文化創新前沿：共同體、政策與實踐
Course Code	: CUS517
Recommended Study Year	: Any
No. of Credits/Term	3
Mode of Tuition	: Lecture
Class Contact Hours	: 3 hours per week
Category in Major Prog.	: MCS (Required course for Digital and Cultural Innovation (DCI) Concentration)
Discipline	: Cultural Studies
Prerequisite(s)	: N/A
Co-requisite(s)	: N/A
Exclusion(s)	: N/A
Exemption Requirement(s)	: N/A

Brief Course Description

Culture and creative commons present an alternative mode of cultural production and provision and an alternative approach to cultural and creative industries. Practices of cultural and creative commons span a long history and a range of terrains. This course examines various forms of culture and creative commons in terms of their histories, designs, organisations, management and cutting-edge trends. We critically assess their relationships with digital technologies, their workers, the cultural market, the city, and the implications for creating a democratic and progressive culture for all. Policies around culture and creative commons will also be addressed so that students can understand the policy-making processes and the impact of public policy frameworks on cultural commoning.

Aims

- 1) To introduce to students major issues and critical theories around culture and society
- 2) To equip students with analytical tools of cultural innovation and commons to understand new developments of cultural production in various cultural sectors
- 3) To analyse different histories, technologies, practices, policies and trends of cultural and creative commons drawn from various local and international contexts
- 4) To familiarize students with alternative and grounded practices of cultural democracy, equality, and community sharing in the process of formulating various forms of cultural and creative commons.

Learning Outcomes (LOs)

On completion of the course, students will be able to:

[Back to Page 1](#)

1. develop processes of culture, creative industries, cultural innovation, cultural policies and the role of (digital) technologies in these processes
2. discuss debates on cultural commons as a tool of cultural innovation to facilitate open and democratic practices
3. employ digital technologies, through evidence-based analysis to raise meaningful questions in the area of cultural and creative commons
4. write proposals of cultural and creative commons that aims to create cultural spaces of democratic, equal and sharing nature, and discuss their feasibility

Indicative Contents

Conceptual underpinnings: commons, peer-to-peer (P2P), and commons transition

- commons, commoners, and commoning
- the myth of the tragedy of the commons and its rebuttals
- commons, peer-to-peer, and commons-based peer production (CBPP)
- CBPP as an alternative mode of (cultural) production
- the degrowth movement and commons transition

Multiplicity of the commons

- common-pool resources and natural resource commons
- civic, social, and urban commons
- knowledge and digital commons
- culture as ordinary and cultural commons
- commons as resources, processes, property regimes, and social institutions

Knowledge and digital commons: the quest to protect and sustain open culture

- knowledge production in historical, legal and comparative perspectives
- enclosure of knowledge and culture under capitalism
- digital technologies and the rise of digital commons
- the organisation and management of cultural and creative commons
- decentralising digital technologies and cultural and creative commons

CBPP and cooperativism as a distinct mode of (cultural) production

- P2P dynamics and rise of peer production in the digital era
- corporate sharing economy vs. platform cooperatives
- owning is the new sharing
- platform cooperatives vs. open cooperatives
- open design and cosmopolitanism: design global, manufacture local

Commons Transition: Future of commons and its relations with state and market

- P2P and the Structure of World History
- degrowth, energy transition, and Zero Marginal Cost Society
- strategies and policies facilitating commons transition
- urban commons transition: cultural commons and urban dynamics
- practices and critiques of radical democracy of commonism

Teaching Method

The course will be taught with lectures and class activities:

- Lectures facilitate students' learning of cultural and creative commons through theoretical discussions and the sharing of real-world examples.
- Discussion of selected topics and readings during meetings, student presentations, and through the planning and delivery of group projects

Measurement of Learning Outcomes

Learning Outcome	Class discussion	Group presentation	Group project
develop processes of culture, creative industries, cultural innovation, cultural policies and the role of (digital) technologies in these processes	✓		
discuss debates on cultural commons as a tool of cultural innovation to facilitate open and democratic practices	✓	✓	✓
employ digital technologies, through evidence-based analysis to raise meaningful questions in the area of cultural and creative commons		✓	✓
write proposals of cultural and creative commons that aims to create cultural spaces of democratic, equal and sharing nature, and discuss their feasibility			✓

Course Assessment

100% continuous assessment, including class discussion (20%), group presentation (in groups of 4-5) (20%) and group project (in groups of 4-5) (60%).

CUS518 Cultural Policy and Community

Course Title	:	Cultural Policy and Community
Course Code	:	CUS518
Recommended Study Year	:	Any
No. of Credits/Term	:	3
Mode of Tuition	:	Lecture
Class Contact Hours	:	3 hours per week
Category in Major Prog.	:	MCS (Required course for Digital and Cultural Innovation (DCI) Concentration)
Discipline	:	Cultural Studies
Prerequisite(s)	:	N/A
Co-requisite(s)	:	N/A
Exclusion(s)	:	N/A
Exemption Requirement(s)	:	N/A

Brief Course Description

This course introduces students to cultural policy as a practical domain in which government, private enterprise and communities interact to manage and develop culture understood as a collective resource. Using case studies to explain the work of cultural policy as a community-building strategy that may contribute to the building modern nation-states, we examine the factors affecting the development of the arts, the media and cultural education in contemporary societies. Special attention is put on the policy issues posed to cities and communities today by the complex forces of cultural globalization. Key issues may include regulation, censorship, access to cultural goods and decision-making processes; cultural consumption, identity politics and citizenship; cultural imperialism, nationalism, and region-formation; cultural planning, urban renewal, and community participation; the cultural/creative industries, talents and education.

Aims

- To introduce students to the global and local dynamics involved in the shaping of public policies on culture
- To study the major concerns on contemporary culture from policy perspectives, thus highlighting a crucial dimension to our understanding of the roles and uses of culture in the world today
- To examine case studies drawn from various social contexts and develop critical perspectives on the values, politics and strategies involved in cultural policy, economy, community and institution

- To help students to understand better the relationships among cultural criticism, cultural studies and policy studies

Learning Outcomes (LOs)

On completion of the course, students will be able to:

1. analyze the key issues addressed, and provide informed views on the concerns of cultural policy in context
2. critique how culture operates as a resource in specific social settings
3. apply theoretical perspectives in cultural policy studies to address concrete local and global issues
4. explain how policy affects the work of cultural institutions, and formulate policy recommendations on the relationship between culture and community

Indicative Contents

Why Cultural Policy Now?

- Culture as a “resource” under globalization
- Resource management: goals and strategies for cultural policy

“Top-down Policy”

- State projects of nation-building; concerns of cultural economy
- Problems with top-down cultural policies

Cultural Institutions: Cultures of Governmentality

- Arts, heritage and tourism
- Creativity management and creative industries

Whose “Culture”?

- From consumerism, identity to citizenship
- Strategic dilemmas: re-thinking urban creativity as a contemporary policy
- Local identity struggles & global cultural changes

Challenges Today

- Culture, policy and governance
- Cultural citizenship: Planning, engagement and sustainability
- Questions of culture and democracy

Teaching Method

The course will be taught in lectures and tutorials

- The lectures facilitate students' learning of cultural policy and community through theoretical discussion and sharing of examples.
- Student presentation and discussion of readings take place in tutorials, and will discuss specific cases of cultural policy issues related to the topic of each week's lecture

Exemption Requirement(s)	:	N/A

Brief Course Description

Urban commons are resources in the city which are managed by the users in a non-profit oriented and prosocial way. They boost a new relationship between us and the urban space we inhabit. This course is the mixture of conceptual debates and grounded practices that introduces the concept and practice of urban commons in the context of cultural studies. It focuses on the ways in which institutional and cultural factors affect the planning, development, and management of urban commons in contemporary societies. Issues of alternative democracy, social economy, participatory community, spatial justice, and gendered and classed subjectivity will be discussed in the context of specific forms and processes of cultural governance.

Aims

- To introduce students the basic concept of urban commons and theoretical debates relating to the shaping of different forms of commons;
- To familiarize students with the alternative and grounded practices of democracy, equality and community sharing in the process of formulating urban commons as a tool of advancing UN SDGs

Learning Outcomes (LOs)

[Back to Page 1](#)

On completion of the course, students will be able to:

- 1) apply the themes and theories in studies of the production, reception and participation of urban commons
- 2) analyse urban commons concepts in relation to related to cultural institutions and practices
- 3) design the questions of democracy, equality and sharing to raise meaningful questions in the area of urban commons in relation to UN SDGs
- 4) write feasible proposal about the formulation of urban commons in a specific area or focus, and discuss their feasibility

Indicative Contents

Theoretical foundations

- What is urban commons? Theories, debates, and models
- capitalism, space, and the city
- UN Sustainable Development Goals

Urban commons in different settings

- A feminist and cultural studies approach toward economies
- Feeding the people: food, rural-urban relation, and the environment
- The collective: Women, worker, and co-op
- Social innovation: creativity, design, and application
- Digital technologies and urban commons
- Urban commons: local experiences

Commoning as method

- Commoning as method: knowledge, participation, and intervention
- Student project presentations

Teaching Method

Lecture, seminar discussion, and term project.

- The lectures facilitate students' learning of urban commons through theoretical discussion and sharing media examples.
- Student presentation in seminars will discuss various academic articles and real-world cases of urban commons
- The term project is a group project where the students draw on theoretical foundations and real-world cases to create their own Urban Commons project to address local issues in HK

Brief Course Description	: This course serves as the second part of the Cultural Politics of Labour series, specifically focusing on digital labour, technology, and the cultural and creative industry. From a theoretical standpoint, the course engages with various theoretical frameworks such as Marxist feminism, autonomist Marxism, and classic Marxism to examine the concept of digital labour and the digital worker within the context of contemporary capitalism. In an analytical sense, the course employs case studies and examples from literature, media, and popular culture to illuminate how the meanings, ideologies, and rhetoric surrounding digital labour and network technology are shaped, manipulated, negotiated, and contested. For instance, it scrutinizes the portrayal of tech companies as 'fun,' 'playful,' and 'creative' workplaces, while also exposing the power dynamics and social inequality underlying these representations through cultural analysis and criticism.

Moreover, the course delves into resistance movements that challenge dominant discourses and meanings, such as the anti-work movements and the '996, ICU' project initiated on GitHub. By completing this course, students will acquire a comprehensive understanding of digital labour and network technology, enabling them to analyse the discourse and underlying ideologies constructed within the media sector and everyday life.

Brief Course Description	: The course takes performance as both an artistic practice and a lens through which we look at the world and humanity to reveal how people behave and display their behavior. It aims to enhance students' understanding of how performative practices could engage the public in dialogue with chosen issues of social concerns. Throughout the course, students take the role of participant-observers, like critical ethnographers do, in workshops and seminars of chosen dramatic genres and in their everyday life. Through investigating social issues in symbolic actions, students would be better informed of ways of understanding the plurality of lived realities of themselves and the others and ways of asking meaningful research questions.
