Department of Economics

Course Recommendation

Elective Courses

ECO 3203

Labour Economics (CRN 440)

This course provides students with an introduction to the economics of labour market and associated government policies. It covers such topics as labour demand and supply, investment in human capital, pay and productivity, labour market discrimination, union and its impact on the labour and unemployment. It also looks into important government policies like minimum wage, education and training, equal opportunity legislation, etc.

ECO4324

Environmental Economics and Policy (CRN 406)

This course mainly applies economic analysis to environmental issues, while insights from environmental science, psychology and political science will also be incorporated. So, the course will be interdisciplinary in nature. The course will start by discussing the source of environmental problems, i.e. externality and market failure, and then focus on two central questions in environmental economics and management: how much environmental quality is desirable and how to achieve this desirable level. Major topics include nonmarket valuation, regulation and international environmental cooperation.

Cluster Course

CLC9016

Contemporary Socio-Economic Issues (CRN 296)

This course provides an introduction to contemporary socio-economic issues using socio-economics as an analytical tool. Socio-economics is an emerging inter-disciplinary field of social sciences that combines economics-based and sociological research methods. From street crime to global climate change, we are surrounded by problems that can be analyzed with socio-economics principles and practices. In this course, we mainly focus on examples that are relevant to our everyday life. Each lecture presents socio-economic concepts within the context of current issues facing our society. With further discussion of socio-economic theories and policy applications, students will gain more insights into the real world.
