SHARING FROM ALUMNI

“ Although I already obtained a bachelor's degree in finance from a prestigious overseas university, I still find the MIBF Programme beneficial to me in so many ways. First, the Programme not only incorporates many professional and practical elements in the curriculum but also finds the right teachers and industry leaders who have the relevant expertise to teach us, helping us smoothly make the transition from school to the real world.

Also, we could gain hands-on experience by doing cases and projects in Venture Capital, Private Equity, Private Banking, FinTech, Big Data, Algo Trading and etc.

Moreover, throughout the Programme, I have built many solid and meaningful relationships with my classmates, who are some of the most talented and amazing people I have ever met.

Last but not least, the Programme has a strong alumni network, providing abundant job opportunities to the graduates. All in all, it was an unforgettable and treasured experience studying the MIBF Program. ”

2022/2023 Graduate,
Analyst at an international
investment bank
Graduated with a bachelor
in finance from University
of Toronto, Canada

“ When I first arrived at Lingnan University, the architecture of the campus presented a good first impression - serene and reasonably removed campus from the city center immediately signaled peaceful and an ideal learning environment.

At Lingnan, the support system and open-door policy from the entire academic team is one of a kind - I was amazed at how the Managing Director was readily accessible when I needed to discuss my academic progress, challenges and collect useful advice.

There are designated consultation hours for all courses ensuring that lecturers are always accessible at specific hours for one-on-one useful academic improvement guidance. This proved particularly useful for me as I was highly satisfied with the attention from lecturers who genuinely took interest in my academic performance.

When I secured a job after graduation it became obvious that the whole MIBF program is designed with industry in mind - the rigor, experience sharing, and extensive group projects ensured that students naturally developed time management, team working and other relevant professional skills through these engagements. I am currently applying heavily the skills learnt in these areas.

The MIBF program is truly experiential - it's engaging and presents a rewardingly-challenging journey of self-discovery. Not to forget, I was also blessed with the MIBF generous admission scholarship without which this pursuit would not have been possible - an opportunity I will always be grateful for. ”
