The Emergent Knowledge Society and the Future of Higher Education: Asian Perspectives

by Deane E. Neubauer (ed.)

Comparative Development and Policy in Asia

Publisher: London: Routledge
Publication Date: 2011
Binding: hardcover
Pages: 224

Summary

The nature of higher education is by no means fixed: it has evolved over time; different models of higher education co-exist alongside each other at present; and, worldwide, there are demands for higher education to change to better help support economic growth and to better fit changing social and economic circumstances. This book examines, from an Asian perspective, the debates about how higher education should change. It considers questions of funding, and of who will attend universities, and the fundamental question of what universities are for, especially as the three key functions of universities - knowledge creation through research, knowledge dissemination through teaching and service, and knowledge conservation through libraries, the disciplinary structuring of knowledge and in other ways--are increasingly being carried out much more widely outside universities in the new "knowledge
