247th in the World**

Rank	University	Articles	Score
247	Lingnan University at Hong Kong (Faculty of Business)	14	5.7

According to the number of publications in UTD 24 top business journals during the statistical period from 2013 to 2019, **Faculty of Business of Lingnan University (LUFB)** ranks **247th** in the world and **21st** in the Greater China. Although LU is the smallest among the eight statutory public universities in Hong Kong and the LUFB is in operation on a small scale (with only around 50 research-track, tenure-track and tenured faculty members), the Faculty's rank is still higher than many large-sized/well-known business schools in the world. This indicates that the LUFB has achieved the international research excellence.

The LUFB was accredited by AACSB—the world's oldest business school accreditation body—in 2011 and has also established the Beta Gamma Sigma branch. In the past decade, the LUFB has continuously made remarkable achievements in academic research. The faculty members have published their papers in most of the UTD 24 top business journals such as *Academy of Management Journal*, *Journal of Accounting and Economics*, *Journal of Consumer Research*, *Journal of Marketing*, *Journal of Marketing Research*, *Management Science*, *Manufacturing & Service Operations Management*, *Operations Research*, *Production and Operations Management*, *The Accounting Review*, etc. Moreover, many publications from the LUFB have appeared in other (non-UTD 24, but also top) journals, which mainly include *IIE Transactions*, *Journal of Financial and Quantitative Analysis*, *Journal of Management Information Systems*, *Journal of Management Studies*, *Journal of Risk and Insurance*, *Naval Research Logistics*, *Personnel Psychology*, *Review of Accounting Studies*, among others.

Sticking to the highest research standards in the world and devoting every effort to continuous improvement of research quality, the LUFB has successfully developed some high-level research centers and built a number of cohesive research teams in which the LUFB's outstanding researchers and external collaborators have been working together on cutting-edge business and interdisciplinary problems. The significant improvement of research performance has increased the LUFB's visibility and impacts locally and abroad. It is believed that, in the near future, the LUFB can further improve its education quality and academic research strength, with an emphasis on delivering more quality research outputs and cultivating more high-end talents with international competitiveness.
