Double Degree in BBA (Hons) – Finance and BSc (Hons) in Innovative Design and Artificial Intelligence (Self-financed)

工商管理（榮譽）學士——金融及創新設計與人工智能（榮譽）理學士雙學位（自資）

Double Degree Programme 雙學位課程

Highlights 課程特色

Two Honours Degrees in Four Years
四年完成雙學位

This is the first inter-faculty/school double degree programme at Lingnan University, jointly offered by the Faculty of Business and the School of Data Science. Students complete a Bachelor of Business Administration (Honours) - Finance and a Bachelor of Science (Honours) in Innovative Design and Artificial Intelligence in four years, while most comparable double degrees in Hong Kong, China require five. The four-year pathway is the result of deliberate design rather than compression: the two degrees share their quantitative and computational foundations, selected courses count towards both degrees, and two structured summer terms in Years 2 and 3 to allow students to complete the credit requirements. Graduates enter the workforce a full year ahead of peers on five-year pathways.

本課程為嶺南大學校內首個跨學院的雙學位課程，由商學院及數據科學學院合辦。學生可於四年內完成工商管理（榮譽）學士－（金融）及創新設計與人工智能 （榮譽）理學士兩個學位，而本港同類雙學位課程一般需時五年。課程經過精心設計，兩個學位共享量化與運算基礎，並於二年級及三年級設暑期課程，讓學生完成雙學位學分要求。相比本港其他五年制同類課程，學生可提早一年投身職場。

International Professional Recognition
國際專業資歷認可

Both halves of the Programme rest on established professional foundations. The Faculty of Business has held AACSB international accreditation since 2011, and the BBA (Hons) - Finance programme is a member of the CFA Institute University Affiliation Program. Graduates are eligible for certain examination exemptions from well-known professional bodies, including the Hong Kong Securities and Investment Institute, the Association of Chartered Certified Accountants, and the Institute of Financial Planners of Hong Kong. The Innovative Design and Artificial Intelligence curriculum is designed with reference to the recommendations of the Hong Kong Institution of Engineers, providing at least 40 contact hours in six key areas across computing and engineering. Students are advised from Year 1 on the steps required to obtain professional recognition.

本課程兩個學位均建基於國際的專業體系。商學院自2011年起獲AACSB國際認證，工商管理（榮譽）學士－金融為特許金融分析師協會 (CFA Institute) 大學聯繫計劃成員。畢業生可獲多個知名專業團體豁免部分考試，包括香港證券及投資學會、特許公認會計師公會，以及香港財務策劃師學會。創新設計與人工智能課程則參照香港工程師學會的建議設計，在六個運算及工程核心範疇提供不少於40小時的課堂時數。學院自一年級起為學生提供專業指導，協助其規劃獲取專業認可。

Where Finance and Artificial Intelligence Actually Meet
金融與人工智能的深度融合

This Programme is not two degrees placed side by side. Students take corporate finance, investment and portfolio management, and financial technology alongside machine learning, GPU and parallel computing, blockchain technology, human computer interaction, and systems integration, verification and validation. The two strands converge in a two-part capstone that runs across both terms of Year 4. In Capstone Project 1, AI-Enabled Innovation and Design, student teams frame a real financial problem and design a solution; in Capstone Project 2, Financial Innovation and Implementation, they build and evaluate a working prototype. Both are offered jointly by the Department of Finance and the Division of Industrial Data Science, under an academic supervisor and, where feasible, an industry mentor. Graduates leave with built work, not only a transcript.

本課程並非單純修讀兩個獨立學位，而是融合兩個學科範疇的綜合課程。學生修讀公司理財、投資與組合管理及金融科技導論，同時修讀機器學習、圖形處理器與平行運算、區塊鏈技術、人機互動，以及系統整合、驗證與確認。兩大學習主線於四年級畢業專題中匯合，學生需於畢業專題一運用人工智能、創新與設計思維，針對真實金融問題提出解決方案；再於畢業專題二圍繞金融創新與實踐，開發及評估可運作的原型。兩個專題由金融學系與工業數據科學組共同開設，除學術導師指導外，學生亦有機會獲業界導師提供專業指導。畢業生不僅獲得學術知識，更能累積職業技能。
