POSTGRADUATE SEMINAR SERIES
Topic Defence Seminar

Topic Title : **The Demand for Bivariate Self-Protection**

Presenter : **Mr Zhou Lin**
PhD student, Institute of Insurance and Risk Management

Abstract : To represent a change in the level of self-protection, the procedure developed by Diamond and Stiglitz (Journal of Economic Theory 8:337-360, 1974) generalize the findings in the relationship between risk aversion and prudence and the demand for self-protection. We address a bivariate self-protection problem by connecting mean-(reference)-utility-preserving increases in bivariate risk and cross prudence. This alternate representation allows the existing findings to be generalized considerably, and also simplifies the analysis.

Date   : 29 April 2022, Friday
Time   : 14:00 – 15:30
Venue   : Zoom Meeting 📹
Meeting ID: 925 4821 8287   Passcode: 91807233

Language : English
