Since 2023, all staff and students at Lingnan University have been given free access to different versions of ChatGPT, with the recent addition of DeepSeek. Generative Artificial Intelligence (GAI) has also been made a Common Core course for all first-year students. Our curriculum focuses on developing students' ability to use AI, apply logical reasoning, explore its potential across disciplines, and address ethical considerations in order to prepare graduates with the critical thinking and analytical skills that will contribute to Hong Kong's science and technology sector.
