

Beloit College Information Sheet for Exchange Program Partners Calendar Year 2026

About Beloit

Beloit College, located in the city of Beloit in Wisconsin on the border with Illinois, is a private four-year liberal arts college offering a wide variety of major fields of study from which students can choose. The College was founded in 1846, two years before Wisconsin became a state. Beloit is dedicated to educating the whole student in order to produce well-rounded and contributing members of society. It is well known for its emphasis in the humanities and sciences in addition to offering outstanding programs in areas such as anthropology and international education. Also renowned for its art and anthropology museums where students can gain hands-on insight into these academic areas, there are numerous opportunities for internships, study abroad, and volunteerism -- all opportunities to take the classroom knowledge outside of the classroom and apply it to the real world. Classes are small, so students receive a great deal of personal attention and interaction with professors who are committed to challenging students to reach their full potential. Beloit offers a diverse environment for living and learning with students hailing from 46 U.S. states and 42 different countries.
