

Master of Arts in Artificial Intelligence and the Future
Hybrid Guest Lecture for AIF503 Ethics of AI

AI Transparency: Conceptual Foundations and Explainable AI Methods

Prof. Changwu Huang

Southern University of Science and Technology (SUSTech)

Transparency is a cornerstone principle of AI ethics and responsible AI development. This talk first explores the conceptual foundations of AI transparency to clarify its definitions, ethical significance and practical implications. Building on this, this talk then discusses key explainable AI (XAI) methods, particularly feature attribution explanation techniques, which serve as essential tools for achieving transparency in AI systems. which are pivotal techniques for enhancing transparency in AI systems. By integrating conceptual frameworks with technical approaches, this talk aims to provide a holistic perspective on AI transparency, thereby supporting research in the fields of AI ethics and trustworthy AI.
