### **Brief Course Description**

This course studies security issues in an anarchic international order, which makes security “scarce” for nation-states. The course examines the causes of the shortage of security from various perspectives. These include the insights of structural realism, defensive realism, and offensive realism. War and peace constitute core issues for the study of international security. In that context, the course will study different theories of the causes of war that span structural forces, domestic-level factors, and leaders’ decision-making. It will also explore alternative strategies to maintain peace and stability and these include balance of power, nuclear deterrence, interdependence, democratic peace, and collective security.

### **Aims**

The main aim is to enhance students’ understanding of the causes of insecurity and conflicts from both historical and contemporary angles. This course should give students’ the ability to make sense of on-going security challenges facing the nation-states as well the world community. Moreover, students should be able to identify alternative strategies to achieve security in the world.

### **Learning Outcomes (LOs)**

Upon completion of this course students should be:

1. equipped to read and understand the literature on international security issues.
2. able to critically evaluate contemporary security issues around the world.
3. able to analyse the alternative benefits of different strategies to achieve peace and stability

### **Teaching Method**

This course consists of lectures, tutorial presentations and discussions mixed; with an expectancy of high interaction between students and instructor in a lively learning environment and resulted in a better learning outcome.

### Important Notes

- (1) Students are expected to spend a total of 9 hours (3 hours of class contact and 6 hours of personal study) per week to achieve the course learning outcomes.
- (2) Students shall be aware of the University regulations about dishonest practice in course work, tests and examinations, and the possible consequences as stipulated in the Regulations Governing University Examinations. In particular, plagiarism, being a kind of dishonest practice, is "the presentation of another person's work without proper acknowledgement of the source, including exact phrases, or summarised ideas, or even footnotes/citations, whether protected by copyright or not, as the student's own work". Students are required to strictly follow university regulations governing academic integrity and honesty.
- (3) Students are required to submit writing assignment(s) using Turnitin.
- (4) To enhance students' understanding of plagiarism, a mini-course "Online Tutorial on Plagiarism Awareness" is available on <https://pla.ln.edu.hk/>.
